

100kWh Energy Storage System Integration in the Yangtze River Economic Belt

It accounts for over 40% of the population, 40% of freshwater resources, and 45% of the country's economic output. Growth in the middle and upper reaches of the Yangtze River Basin (YRB) lags ...

Based on the panel data of prefecture-level cities from 2005-2019, this paper used the difference-in-differences method to study the effects and mechanism of the implementation of the Yangtze River ...

Construction along the Yangtze River has pointed out the direction and promoted the vigorous development of the economic level and energy efficiency of the Yangtze River Economic Belt.

A subsidiary of China National Offshore Oil Corporation (CNOOC) has completed the construction of China's largest LNG storage base, a move that aims to ensure energy security and support green ...

For this purpose, this paper uses the super-efficiency SBM model, ML index and Tobit model considering undesired output to explore the energy efficiency and the main factors affecting it of nine...

Fundamentally, the modern energy system is still an energy system, including energy exploitation, production, conversion, transportation, trading, distribution, storage, and utilization.

This paper uses the two-stage NDEA-SBM model to calculate the energy, ecology, and economic (3E) efficiency of the Yangtze River Economic Belt (YREB) and analyze the spatial ...

Here, we focused on the Yangtze River Delta (YRD) urban agglomeration in China and proposed an optimization framework for energy, environment, and economy.

Explores the spatiotemporal evolution of trade-offs and synergies between urbanization and carbon balance in the Yangtze River Economic Belt.

A perspective of ecological civilization: Research on the spatial coupling and coordination of the energy-economy-environment system in the Yangtze River Economic Belt.
