

China's first and largest onshore wind farm to deploy 10 megaWatt turbines at scale officially entered commercial operation in North China's Inner Mongolia Autonomous Region on ...

HOHHOT, Dec. 19 -- A 3.1-million-kW wind power project, one of the country's first large-scale wind power base projects, was put into operation Monday in north China's Inner Mongolia ...

According to the regional energy administration, the total installed capacity of new energy in Inner Mongolia hit 154 million kW, maintaining its position as a national leader.

This means the region's installed capacity of wind power will reach 98 million kilowatts, and that of solar power will reach 52 million kilowatts by 2025, the regional government said Monday.

The Xinglong 200 megawatt wind power project in Hexigten Banner, Chifeng City, North China's Inner Mongolia Autonomous Region has been fully connected to the grid.

HOHHOT, Dec. 19 -- A 3.1-million-kW wind power project, one of the country's first large-scale wind power base projects, was put into operation Monday in north China's Inner Mongolia Autonomous ...

Inner Mongolia has launched a groundbreaking wind-solar power cluster in the Kubuqi Desert, a significant milestone for China's renewable energy efforts. Developed by the China Three ...

The Western Inner Mongolia Power Grid (Mengxi Grid) generated 73.1 billion kilowatt-hours of renewable electricity--mainly from wind and solar--in the first half of 2025, up 41% year-on ...

With a total investment of 98.8 billion RMB, the project plans to build 8 million kW of photovoltaic capacity and 4 million kW of wind power, supported by 4 million kW of coal power and 5 ...

Coal slime and coal gangue are used as the main raw materials to build a peak-shaving power plant project. Through the combination of the peak-shaving power plant and the new energy ...
