

An LCD inverter in a laptop is responsible for converting the DC power from the battery to AC power, which is necessary to illuminate the screen's backlight. This conversion is vital for the ...

Introduction to Inverter What Is Rectifier External Commutation Inverters Self-Commutation Inverters Single-Phase Current Source Inverter The inverters are categorized in 2 main types through the commutation method employed for exterior commutation and self commutation. External commutation inverters are inverters for which energy is needed to off the SCR is given through the exterior motor or supply. The instance of exterior commutation inverter can be seen here.
