

Are rooftop photovoltaic panels a scam

Are they safe

Does rooftop solar have a fraud problem?

Rooftop solar has a fraud problem. The industry is working to build back trust. All this threatens the residential rooftop solar industry's impressive momentum, and some are working to repair its reputation. But what if you want to go solar now?

Are solar panels a scam?

Solar panels themselves are not a scam. When the sun shines on solar panels, they produce electricity that can be used to power appliances and devices in your home. Making your own solar energy this way saves you money on your utility bills. That's not to say solar panel scams aren't real--just that the technology itself is not the problem.

How do I protect myself from solar scams?

Protecting yourself from solar scams means taking a proactive approach and following a few key strategies. One of the most effective ways to protect yourself from solar scams is to know the average cost of solar panels in your area. By researching prices, you can identify quotes that are suspiciously high or low.

What are the most common solar scams?

One of the most prevalent solar scams involves misleading lease agreements or power purchase agreements (PPAs). While these financing options are legitimate ways to access solar energy, unethical companies may misrepresent the terms or benefits of these agreements.
