

Battery Type: High-performance Ternary Lithium Battery - Battery capacity: The R500 model is equipped with a 53.6kWh battery pack, while the R550 model is equipped with a 60.2kWh ...

CATL and BAIC's NEV arm BJEV jointly unveiled on September 26 the world's first cell-to-pack (CTP) battery pack, shortly after the Chinese EV battery giant disclosed at the IAA 2019 its ...

After completion, it will start large-scale manufacturing of high-quality electric vehicle batteries for BAIC, Xiaomi, LI, and other auto enterprises in Beijing-Tianjin-Hebei region, ...

This guide explains which battery tech (Flooded vs EFB vs AGM) best fits BAIC vehicles, how to choose the correct size, and how to install and care for it. When you're ready to shop, jump ...

On June 4th, the OS battery pack developed by CALB for BAIC's new generation of electric vehicles was successfully launched in Chengdu.

The Chinese electric car BAIC EX3 was recently upgraded and is now powered by a NCM battery made by Guoxuan with an energy density of 200 Wh/kg. This is the most energy dense ...

The bottom line: By getting creative with how cells, modules, and packs fit together, EV makers are cheating the laws of physics a bit. They pack more juice into each square inch while ...

CALB Group Co., Ltd. (CALB) announced that its One-Stop (OS) battery pack developed for BAIC Motor next-generation electric vehicles (EVs) rolled off the production line in Chengdu.

To account for rapid evolution in battery pack design and associated uncertainties for future disassembly cost developments, a sensitivity analysis was conducted on the BAIC BJEV pack.

CALB's product for the BAIC project is the world's first One-Stop (OS) lithium iron phosphate (LFP) battery pack. As a new generation of OS fast-charging products, it features high ...
