

As a first step to reach this goal, the Lebanese Ministry of Energy and Water (MEW) and LCEC prepared and launched a tender for the first grid-connected photovoltaic (PV) plant in Lebanon's history, the ...

Like tens of thousands of Lebanese people, the Mazloums have turned to solar power to generate reliable--and cost-effective--electricity in a country where the crisis-stricken state provides ...

Nine years ago, Lebanon completed the first phase of its largest national solar energy project, the "Beirut River Solar Snake," generating 1 megawatt of electricity for Electricité du Liban ...

Faced with chronic shortages from the public supplier Electricité du Liban (EDL), rampant private diesel generator rationing, and high fuel prices and electric bills, Lebanese citizens ...

In 2021, as the crisis deepened, people realized the importance of renewable energy, particularly solar energy, and the country saw a huge increase in the installation of solar panels and ...

We are on a mission to accelerate the transition to renewable energy by providing professional energy consulting services, industrial (EPC) services, and increasing public energy literacy and awareness.

The contracts authorize Merit Invest, a subsidiary of the French shipping giant, to develop three solar farms with a total capacity of 45 megawatts. The projects will be located In Mount Lebanon, the North ...

This has pushed tens of thousands of Lebanese to look for alternatives - and notably to solar photovoltaics - in an attempt to ensure their basic electricity coverage. Since early 2020, solar ...

Spanning 10,000 m² above the Beirut river bed, the 1 MWp photovoltaic plant supplies green energy to the national network of the Lebanese electric utility Electricité du Liban (EDL) and will ensure the ...

Beirut's solar revolution isn't coming - it's already here. With installation costs dropping 27% since 2020 and battery storage becoming more affordable, photovoltaic panels offer a practical solution to ...
