

How many iron blocks do you need to make a beacon?

You will need 164 iron blocks for a full beacon. This is also equivalent to 1,476 ingots. In addition to iron blocks, you'll also need 3 obsidian blocks and a nether star. To get maximum benefits, you need to make a quadruple-layered pyramid. Here's the number of iron blocks per layer of beacon:

How many blocks do you need to build a beacon?

Place the beacon block atop a pyramid of some combination of iron, gold, diamond and emerald blocks. The pyramid can be 1--4 layers high; you'll need 9 blocks for the top layer, 25 for the second, 49 for the third and 81 for the last. The more layers you build, the larger the area of the beacon's effects and the more effects you will have access to.

What blocks can be used to build a beacon base?

You can't use just any block to build a beacon base. The pyramid must be made of the following solid mineral blocks: You can use any combination of the above blocks in your pyramid. For instance, you might use iron blocks for the lower layers and top it off with gold or diamond blocks -- the beacon will function just the same.
