

On October 28, international media reported that Singapore-based renewable energy company Equator Renewables Asia (ERA) signed an agreement with CNNC's subsidiary CNNP Rich ...

The CSP project was successfully connected to the power grid on September 20, 2024, marking the first "CSP + PV + wind power" project in China to achieve full - capacity operation.

The 2 million kW PV demonstration project by the China National Nuclear Corporation (CNNC), one of the country's largest nuclear power operators, integrates PV and nuclear power, ...

This page provides information on CNNC Yumen 100MW Fresnel + 400MW PV + 200MW Wind CSP project, a concentrating solar power (CSP) project, with data organized by background, participants, ...

Leveraging this demonstration project, CNNC is advancing the integrated development of new energies such as solar and geothermal energy through three key innovations.

Astronergy, a tier one solar panel manufacturer, has won a major centralized solar module procurement from China National Nuclear Corporation (CNNC), securing a place in the largest PV bidding project ...

China National Nuclear Power (CNNP), a subsidiary of China National Nuclear (CNNC), has reportedly commenced construction on a 2GW offshore solar photovoltaic (PV) farm in East ...

Construction of China's largest offshore solar farm officially commenced at Haibin harbor in Lianyungang city, East China's Jiangsu Province on Sunday, China National Nuclear Corp (CNNC)...

The project is located near the Tianwan Nuclear Power Plant. It is divided into two parts: offshore and onshore. The offshore part consists of over 3.3 million photovoltaic modules forming ...

The solar farm is part of the country's efforts to increase clean and renewable energy generation to support the rapid economic development of its coastal provinces. The facility is ...
