

These 22 photos shed light on the might and innovation of the world's most powerful solar plants, each image a testament to the leaps made in clean energy technology.

To a photographer standing on the ground, the solar power plants that cover hundreds of acres of California or Nevada desert appear to stretch into the horizon.

Shooting Solar Plants from The Sky
Two Types of Solar Power Plants
A View of Unintended Artistic Beauty
In 2021, Hegen traveled through the United States, France, and Spain to photograph vast solar energy infrastructures that will be delivering clean energy for generations to come. The photos were shot from a helicopter. "In a single hour, the amount of power from the sun that strikes the Earth is more than the entire world consumes in a year," Hegen...
