

Can photovoltaic panels be built on commercial land

Do I need planning permission for my commercial solar installation?

You will probably need planning permission for your commercial solar installation if any of the following circumstances apply: Now, it's worth remembering that if your commercial solar panel installation falls into one of the categories above, that doesn't necessarily mean that your planning application will be rejected off the cuff.

Can solar panels be installed on a building?

These cover: "The installation, alteration or replacement of: (c) other solar PV equipment on the roof of a building, other than a dwellinghouse or a block of flats." However, in order to qualify as permitted development, solar panels still have to meet certain conditions, which we've laid out below.

Do commercial solar panels need development rights?

We'll give you the short answer to start with: probably not. Most commercial solar panel installations meet the requirements for Permitted Development. Permitted development rights essentially allow you to carry out certain building works and changes of use without having to make a planning application (within reason).

Can I install solar panels in a conservation area without planning permission?

As mentioned above, you are able to install solar panels in a conservation area without planning permission due to Permitted Development Rights. However, if the system will be on a wall fronting the highway or a ground-mount solar PV system, this will need planning permission.
