

The City of Cape Town will, in the third quarter of this year, release an RFP for 100MW of battery energy storage systems in an effort to bolster energy security.

The City of Cape Town has issued a tender for a battery energy storage system (BESS) with a minimum rated power output of 5 MW and energy storage capacity of 8 MWh.

Cape Town's BESS project, co-located at the Atlantis PV plant, is designed as a pilot to test energy storage integration within the city's power network. The combined solar PV and battery system will operate as a ...

With rolling blackouts affecting 200+ days annually [1], South Africa urgently needs solutions like the Cape Town Energy Storage Power Station. This 200MW/800MWh facility - one of Africa's largest battery projects ...

Cape Town is set to become the first city in South Africa to own and operate its own solar plant. Construction is now underway on the city's own 7 MW facility, which will have potential to...

Ener-G-Africa (EGA), an African company tackling the challenges of climate change through clean energy, officially launched a new 15MW per annum women-led solar panel assembly plant in Cape Town - only the ...

City of Cape Town, which is in the process of procuring up to 200 MW of renewable energy from independent power producers (IPPs), expects to initiate a utility-scale battery energy storage ...

South Africa's energy landscape just witnessed a seismic shift as the Cape Town energy storage project secured its bid through a competitive tender process. This 200MW/800MWh battery system promises to ...

A solar-plus-storage project is being planned for the legislative capital of South Africa, as the city looks to move "away from Eskom reliance and towards a load-shedding-free Cape Town", its Mayor said.
