

This paper provides a comprehensive overview of the current state of lithium in Chile, with a forward-looking assessment in the context of the ongoing national lithium strategy. The global ...

Discover how Chile increased lithium resources by 28% to 14.05 million tons, strengthening its global energy transition role.

While Chile's decision is fueling much debate and commentary, this article explains why Chile's lithium production is particularly important and lays out some of the key questions and ...

With excellent progress, CJR Renewables is leading the way in delivering clean and sustainable energy in Chile.

A new ICCT-CMS report outlines a roadmap for Chile to evolve from lithium exporter to regional battery production hub, generating billions in revenue and thousands of clean-tech jobs by ...

Chile lithium valley is officially open for business. Backed by a \$2 billion investment spanning from 2025 to 2028, Chile is turning the salt flats of Antofagasta and Atacama into a next-gen battery production ...

The ICCT-CMS report highlights the opportunity for Chile to transition from being an exporter of lithium to a Latin American center of electric vehicle battery production, contributing to ...

Further, the analysis assesses the GHG emissions intensity, water consumption, and social impacts of lithium mining and battery production in Chile, in addition to opportunities for battery ...

At the core of the project are 67 SMA battery systems with powerful SMA battery inverters combined with batteries by eStorage, a subsidiary of Canadian Solar Inc. SMA is also ...

This article explores the role of inverters in lithium battery energy storage systems, their applications across industries, and why local manufacturers are pivotal to Chile's sustainable energy transition.
