

From January through October, battery exports rose 47% year-on-year to about 78 gigawatt-hours (GWh). Shipments intended for grid-connected and behind-the-meter energy storage ...

EVs and batteries are now worth more than double the value of China's solar PV exports. This milestone is remarkable because it comes even as technology prices have fallen sharply.

The world will almost completely rely on China for the supply of key building blocks for solar panel production through 2025. Based on manufacturing capacity under construction, China's share of ...

Amaxpower New Energy Tech Co., Ltd. is a leading China solar energy battery storage exporter, specializing in high-quality battery storage solutions for solar power systems.

From 2018 through 2022, solar parts were the dominant export earner among China's clean energy suite, but since then a drop-off in solar sales as key markets hit saturation point has...

In 2023, Chinese investment into battery capacity increased by nearly 30%, shifting from EVs to energy storage systems (ESS). What's more, China's planned energy storage capacity for ...

The "new three" has been a buzzword among Chinese officials and state media recently, as they highlight the strong performance of solar cells, lithium-ion batteries and electric vehicles ...

A tool to uncover insights from the latest clean technology export data from China, including solar PV, batteries and electric vehicles. Explore by electrotech type, country or region.

SINGAPORE (ICIS)-China will abolish value-added tax (VAT) rebates on exports of photovoltaic and battery products, and related chemicals such as methanol, ethylene glycol (EG), ...
