

Corrosion-resistant folding containers for the Port of Spain

Every TLS modular container is built on a fully welded steel frame, ensuring exceptional structural strength and resistance to impact. Through precision welding and strict quality control, we ...

Developed to meet global requirements for container and bulk handling equipment, our products provide year round protection and can be used for new construction and as part of your ongoing ...

High Quality Foldable Shipping Container for Marine Logistics and Port Use Corrosion Resistant

VCI technology emits corrosion-inhibiting molecules that form an invisible layer on the surface of metal goods. This barrier effectively prevents moisture and salt particles from triggering ...

The repositioning of empty containers is one of the most complex problems in global freight distribution today. There are few balanced trade routes and larger ocean vessels have increased the need for ...

COLLAPSECON containers are collapsed at speed by the COLLAPSECON Operating Station, the only automated solution on the market. It is designed to seamlessly integrate into operations at scale, ...

We design foldable intermodal shipping containers that exceed ISO and CSC standards, and the systems needed to fold them standing upright in bundles, safely and quickly.

Easily applied zinc, zinc-aluminum or aluminum coatings significantly extend container service life with a sacrificial corrosion barrier that provides long-lasting protection on steel surfaces.

We work with our customers to create your corrosion resistant photovoltaic PV distribution boxes with easy access and egress of lines and cables without bends and tension.

KRON represents anti-corrosion coatings for lighthouses, fuel terminals, sea locks, containers, floating cranes, and other objects which are used as port infrastructure.
