

How much electricity does Paraguay produce per year?

of electric energy per year. Per capita this is an average of 2,168 kWh. Paraguay can completely be self-sufficient with domestically produced energy. The total production of all electric energy producing facilities is 44 bn kWh, also 298 percent of own requirements.

What is the value of energy in Paraguay in 2021?

The World Bank, on the other hand, shows a value of 58.8% for the year 2021. Energy budget, consumption and production capacities in Paraguay, including a comparison with the USA.

How can Paraguay boost its low-carbon electricity generation?

To boost its low-carbon electricity generation, Paraguay can focus on expanding its portfolio beyond hydropower by harnessing additional clean energy technologies, especially solar and nuclear energy. Solar energy presents a significant opportunity due to Paraguay's geographic location with abundant sunlight.

Why is Paraguay a leader in sustainable electricity generation?

This clean electricity achievement places Paraguay among the leaders in sustainable electricity generation globally. Beyond its borders, Paraguay significantly contributes to lowering regional emissions as a key net exporter of electricity, helping neighboring regions to reduce their reliance on fossil fuels.

Additional notes: Capacity per capita and public investments SDGs only apply to developing areas. Energy self-sufficiency has been defined as total primary energy production divided by total primary ...

Energy budget, consumption and production capacities in Paraguay, including a comparison with the USA. CO2 emissions, share of renewable energies

National Electricity Administration (ANDE) announced a record-breaking growth of 18% in Paraguay's energy consumption over 2024. ANDE ...

Paraguay established renewable energy targets in its National Development Plan 2014-2030. The country's goal is to reach 60% of renewable energy in total energy consumption by ...

Electricity generation and consumption, imports and exports, nuclear, renewable and non-renewable (fossil fuels) energy, hydroelectric, geothermal, wind, solar energy, etc. in Paraguay.

Official and up-to-date data of Paraguay for all years of statistics, in an easy-to-read format. Analysis of electricity consumption with advanced tools for comparisons, trends, shares, and various metrics.

What is Paraguay's average energy consumption per person? When comparing the total energy consumption of countries, the differences often reflect variations in population size. It's useful to look ...

National Electricity Administration (ANDE) announced a record-breaking growth of 18% in Paraguay's

energy consumption over 2024. ANDE president Félix Sosa classified the unprecedented ...

NOTE: This time series graph shows the Electricity Consumption of Paraguay based on our stored data from 2004 to 2024, taken from the CIA World fact books of the respective years.

The present dataset includes raw and processed electricity consumption and meteorological data. Electricity demand belongs to the records of the National Interconnected ...

Although Paraguay boasts a fully low-carbon electricity supply, recent data from 2023 reveals that the per-person electricity consumption has not reached past levels and stands at ...
