

# Farmer uncle made his own solar power generation

Can solar power be used on farmland?

Joshua Pearce and Ethan Winter lead efforts to understand the impact and encourage large-scale solar power generation on farmland. Agrivoltaics, a relatively new term, unites cropping practices and solar panels on the same fields. Installed solar panels can provide a perennial electrical energy harvest, feeding directly into the power grid.

Can you build your own Solar System?

Whether you're preparing for a more sustainable lifestyle, reducing your reliance on the grid, or just powering a cabin or van, building your own solar system can be incredibly rewarding. In this guide, we'll walk through the entire process, step by step, with clear language and practical tips--no electrical engineering degree required.

Can you harvest more than just electricity on a solar farm?

In Colorado, we are learning how it's possible to harvest more than just electricity on a solar farm. Just south of Longmont, Colorado, in the sun-drenched foothills of the Front Range, is a small but bustling family-owned farm.

Can I build my own off-grid solar power system?

Building your own off-grid solar power system can feel intimidating--but with the right info, it's totally doable. Take your time, start with a modest system, and enjoy the process. The freedom of producing your own power is well worth the effort. For more DIY off-grid tips and gear breakdowns, check out our full DIY Solar Guide archive.
