

Let's face it - energy storage battery cabinets aren't exactly the Beyoncé of renewable energy systems. But just like backup dancers, they're critical to the show.

As the leading manufacturer in Finland, we make tailored electrical and automation cabinets for demanding conditions, including in the marine industry and food industry.

Our specialty is automation cabinets. Our own electrical design team plans the cabinets using EPLAN or CADS and the cabinets are manufactured at our own workshop.

Follow this detailed guide for a smooth installation of your solar battery cabinet and maximize renewable energy use

The cabinet shelves provide fire extinguishing capabilities via a gravity-fed system. Therefore, they must be installed correctly to be effective in a battery fire situation.

Refer to "Securing the Batteries Using the Battery Retention Strap" on page 21 for instructions on securing the batteries using the buckle strap provided with the battery cabinet.

A universally recognized online training course within our industry, dedicated to eliminating fatalities, injuries, property, and economic losses caused by fire, electrical, and related hazards.

After completing this module, you will be aware of issues affecting the safety of cabinet design and assembly, know what serviceability means and be aware of the issues affecting the selection of the ...

The documentation available online is generally the latest version.

We build electric cabinets with components and wires according to customer wishes. We take care of components and assemble them so that they are easy to take into use.
