

How many kilometers of solar power can India generate

With 18 GW already added in the first half of 2025, cumulative solar capacity has reached 116.4 GW, and steady additions of around 30 GW annually will keep India on track.

OverviewHistorySolar potentialInstallations by regionInstallations by applicationConcentrated solar powerHybrid solar plantsSolar heatingSolar power in India is an essential source of renewable energy and electricity generation in India. Since the mid-2010s, India has increased its solar power significantly with the help of various government initiatives and rapid awareness about the importance of renewable energy and sustainability in the society. In order to decrease carbon dioxide emissions, reduce reliance on fossil fuels, with coal being th...

India has achieved 5th rank in the world in solar power deployment. As on 30-06-2023, solar projects of capacity of 70.10 GW have been commissioned in the country.

These systems include solar lights, solar-powered agricultural water pumps, and local mini-grids. Their total capacity has exceeded 5.12 GW, reducing costs for rural users and lowering ...

Solar power generation capacity in India reached 100.32 GW as of January 31, 2024, marking a 30-fold increase over the past nine years. Rajasthan leads with the highest installed solar ...

As per Renewable Energy Statistics 2025 by IRENA, India ranks 5th worldwide in total electricity energy generation from renewable energy sources and holds the 3rd position in electricity generation from ...

India has added a total of 72.02 GW solar power capacity so far, Union Minister for New & Renewable Energy and Power, R. K. Singh told the Rajya Sabha on Tuesday.

While India's solar and wind capacity is growing rapidly, actual generation still reflects a heavy dependence on coal. The chart visualizes the generation share of each energy source for May ...

The Gujarat Hybrid Renewable Energy Park, being built near Khavda in the Rann of Kutch desert in Gujarat, will generate 30 GW AC power from both solar panels and wind turbines. It will become the ...

Initiatives like solar panels, solar parks and rooftop solar projects have brought about revolutionary changes. As a result, today India has successfully achieved the target of 100 GW of ...

India, along its desolate border with Pakistan, is building what it boasts will be the world's largest renewable power plant, an emblem of a determined push to boost solar energy.
