

In a significant step toward a more resilient and decentralized energy future, Iran's Renewable Energy and Energy Efficiency Organization (SATBA) has announced major progress on its plan to build ...

Designed to expand to 600 MW by March 2027, Aftab Sharq will become Iran's largest solar facility upon completion. The remaining 480 MW will be installed over the next 18 months in ...

Developed by MAPNA Group specialists, the plant is located 45 kilometers from Isfahan and covers an expansive 1,200-hectare area. According to project officials, this first phase of the ...

Recently, Jafar Mohammadi Nejad Sijaroudi, Deputy Director of Investment at Iran's Renewable Energy and Energy Efficiency Organization (SATBA), confirmed that the country has ...

The project aims to supply the necessary equipment for building 586 solar plants with a capacity of 3.0 MW each nationwide. The total project cost is 4.585 billion yuan, with 3.897 billion ...

Iranian First Vice-President Mohammad Mokhber announced that the nation has established a comprehensive plan for the construction of solar PV power plants, which will generate ...

Iran has recently secured significant financing from China to support the construction of a massive solar power plant project with a total capacity of 1,758 megawatts (MW).

Constructing 29 solar farms is a monumental undertaking that requires a deep understanding of photovoltaic technology and logistics. The journey from a government permit to a ...

Discover Iran's plan to develop 15GW of new solar capacity by 2030. Learn about the \$8.3B project, increased local panel production, and its economic impact.

Iran has signed agreements with "multiple nations" to co-develop PV technologies, share equipment, and achieve a 12% solar share of total generation by 2026--up from 0.6% today. ...
