

Jolywood's modules are equipped with a DC copper cable with a cross-sectional area of four mm<sup>2</sup>, rated voltage 1500V DC, insulation resistance up to 90 $\times$ 10<sup>6</sup> $\Omega$  and UV-resistant, and all cables used to connect ...

JW-D72N Series (Multi-Busbar) Jolywood N-type High Efficiency Monocrystalline Silicon Bifacial / White Glazed Double Glass Module

Low LCOE Adopting high-power solar cell with 1500V technology to decrease the LCOE of the whole photovoltaic system to increase the ROI.

**Durability:** Constructed with corrosion-resistant frames and tempered glass to withstand extreme weather conditions for over 25 years. **Efficiency:** Achieves high module efficiency up to 21.3%, ...

As a global leader in n-type technology, Jolywood was among the first PV enterprises in China to develop n-type TOPCon technology and achieve GW-scale mass production.

Delivering 585W to 600W output, it features a single-glass design, windproof construction, and advanced n-type cells--ideal for both residential and commercial solar energy systems.

Detailed profile including pictures, certification details and manufacturer PDF.

Jolywood photovoltaic modules guarantee efficient electricity production, thanks to technological solutions that maximize the use of the sun's rays. They are an excellent choice both if you opt for a ...

Solar orientation and inclination will influence how well a PV array or a solar panel performs. However, roof tilt (inclination) and southern orientation (azimuth) are quite flexible ...

With its advanced bifacial technology, JOLYWOOD ensures increased power generation even in low-light conditions, making it ideal for various installations, from residential to commercial projects.
