

Designed to store 450 MWh of clean energy - enough to power 150,000 homes daily - this facility combines lithium-ion battery systems with advanced energy management software.

In 2023, the City of Lima partnered with D3 Energy, LLC for the design and construction of floating solar panels that will be located on the surface of Twin Lakes Reservoir, next to the City of ...

LIMA, OH (WLIO) - Plans are progressing on Ohio's largest floating solar field and it's going to be right here in Lima. The city got a \$500,000 grant from the Department of Energy to install a 4 ...

By this time next year, a 3,444-panel solar array will be floating on the southern half of the reservoir with the goal of producing enough energy to power the nearby water treatment plant.

This large-capacity, modular outdoor base station seamlessly integrates photovoltaic, wind power, and energy storage to provide a stable DC48V power supply and optical distribution.

It's smart infrastructure. In Lima, Ohio, nearly 3,000 floating solar panels are under construction at the Twin Lakes Reservoir -- projected to save the city \$10 million in energy costs.

On Monday, May 22nd, 2023, City Council will be considering legislation to enter into a contract with D3 Energy, LLC for the design and construction of floating solar panels that will be located on the ...

On October 23rd, the City of Lima broke ground on a new floating solar array, which will use clean energy to save money for ratepayers and taxpayers.

Lima council passed an ordinance in May 2023 entering into a contract with a company that builds floating solar panels. Previous reporting said the project would be the largest floating solar...
