

This article examines how BESS are revolutionizing energy markets by enabling widespread renewable energy integration, exploring market dynamics, growth projections, and ...

That's exactly what Ljubljana's energy storage power initiative is achieving. Nestled in Slovenia's capital, this project combines cutting-edge battery tech with smart grid solutions to tackle ...

The Republic of Moldova will install a 75 MW energy storage system (BESS) and 22 MW internal combustion engines as part of a project funded by the U.S. Government through USAID. [pdf]

Mobile energy storage solutions This article explores mobile energy storage, detailing different types, their benefits, and practical applications across diverse industries while highlighting the latest ...

GSL ENERGY's 480kWh BESS project in Slovenia showcases how renewable energy solutions can deliver tangible value to businesses. By prioritizing efficiency, reliability, and scalability, ...

Applications for 400 MW have been submitted for the connection of battery energy storage systems to the distribution grid, according to Elektro Ljubljana, one of the distribution system ...

European Commission has approved a EUR150 million Slovenian scheme to support the rollout of renewable energy and heat as well as energy storage, in line with the Green Deal Industrial Plan.

Danish renewables company European Energy A/S has begun construction of its first large-scale battery energy storage system (BESS) project in Denmark, seeking to install an initial capacity ...

A medieval city where dragon legends meet cutting-edge battery tech. Welcome to TIMES Energy Storage Ljubljana - where Slovenia's capital is quietly becoming the Bruce Wayne of ...

Multinational utility and IPP Engie has launched construction on a 200MW/800MWh battery energy storage system (BESS) in Belgium. The France-headquartered firm announced the start of ...
