

Data and information about Solar power plants and their location plotted on an interactive map of China.

This project, located in the desert region of Midong District in Urumqi, Xinjiang, has set a new record for the largest PV installation globally, surpassing previous benchmarks and solidifying its ...

A 150 MW/300 MWh grid-forming shared energy storage power station in Yongde County, Lincang City, Yunnan Province, was recently put into operation. The project is said to be the first of its kind in the ...

A Chinese state-owned company said on Monday it had connected the world's biggest solar plant to the grid in northwestern Xinjiang.

The following pages list the major power stations in China by province: o List of major power stations in Anhui o List of major power stations in Beijing o List of major power stations in Chongqing

A 150 MW/300 MWh grid-forming shared energy storage power station in Yongde County, Lincang City, Yunnan Province, was recently put into operation. The project is said to be the ...

A solar thermal power station in Hami, Xinjiang Uygur autonomous region, began full capacity production recently. The 50-megawatt power station, on a wide stretch of desert and ...

Scientists led by the China Agricultural University have created a national-scale map and dataset of ground-mounted PV power stations in China. The data is based on Sentinel-2 imagery ...

The world's largest solar farm, in the desert in northwestern Xinjiang, is now connected to China's grid. The 3.5-gigawatt (GW), 33,000-acre solar farm is outside Urumqi, Xinjiang's capital.

In the arid region of Xinjiang in northwest China, a new solar park spanning an impressive 2,000 hectares has come online. To put this into perspective, the facility covers an area equivalent to ...

The following page lists some power stations in mainland China, sorted by energy source and location.
