

Mexico's new 30% battery storage mandate is set to transform the renewable energy sector. Learn how this policy impacts grid stability, private investment, and the future of energy ...

Mexico has published the results of the 2025 Private Power Generation Projects Call, awarding more than 3 GW of renewable energy capacity and 1,257.4 MW of battery energy storage ...

This reflects a significant commitment to strengthening Mexico's energy infrastructure, aimed at improving the stability and efficiency of the national electricity system, where battery ...

Mexico is seeing a surge of large-scale solar and battery storage proposals across multiple states following an October decree that sets clearer rules for private energy investments.

According to the regulations promulgated in March 2025, all new solar and wind power projects must be equipped with battery systems equivalent to 30% of their installed capacity, with a ...

As Mexico accelerates its energy transition, Battery Energy Storage Systems (BESS) are rapidly emerging as a cornerstone of the country's power strategy.

Battery Energy Storage Systems (BESS) have gained momentum in Mexico, with both the federal government and private companies ramping up plans to install several gigawatts of capacity over the ...

Mexico's energy landscape is undergoing a radical transformation, and the Mexico Energy Storage Demonstration Project stands at the forefront of this revolution. This initiative combines cutting-edge ...

Future wind and solar energy projects in Mexico will be required to collocate battery energy storage systems equivalent to 30% of their capacity, a senior government official told the ...

By combining specific regulations, a storage mandate for new renewable projects, and long-term planning, Mexico is emerging - according to OLADE - as a regional benchmark for energy ...
