

The Republic of Moldova needs new technologies to help integrate more renewable energy into the national grid, including smart electricity meters, electric cars capable not only to charge ...

We specialize in large-scale energy storage systems, mobile power stations, distributed generation, microgrids, containerized energy storage, photovoltaic projects, photovoltaic products, solar industry ...

The contract is expected to be signed in the coming weeks, with the works scheduled for completion by the end of September 2026. The storage systems will be installed at CET Nord in ...

Huijue Group's Home Energy Storage Solution integrates advanced lithium battery technology with solar systems. Ranging from 5kWh to 20kWh, it caters to households of varying sizes.

Integration of all energy storage system components, the output of which can be directly connected to the utility and photovoltaic systems. Multiple cabinets can be connected in ...

We develop battery modules, racks and energy storage systems designed to power industrial applications across challenging sectors, including construction, maritime, defence, and grid systems.

Custom energy storage containers offer Balti industries a strategic path to energy resilience. By combining localized expertise with global technological advancements, businesses can achieve ...

Geographically positioned between Romania and Ukraine, the cross-border power system of the Republic of Moldova is critical for regional energy security and regional integration with the European ...

Huijue's Industrial and Commercial BESS are robust, scalable systems tailored for businesses seeking reliable energy storage. Our solutions integrate seamlessly into large-scale operations, supporting ...

Emerging markets in Africa and Latin America are adopting mobile container solutions for rapid electrification, with typical payback periods of 3-5 years. Major projects now deploy clusters of 20+ ...
