

The Edge is the most sustainable office building on earth with a BREEAM-NL rating of 98.36%. A net zero energy building, The Edge produces 102% of its own energy.

Known to many as the building design of the future, this office in the heart of Amsterdam has gained international recognition as the most sustainable and smartest office building in the world.

The addition of an aquifer provides both heating and cooling and solar PV on south facade and roof has resulted in a 70% reduction in electricity costs for the building.

As Dutch cities accelerate their transition to sustainable energy, the Voltsmile V10 RPC battery system paired with Victron Multi RS inverters has emerged as a game-changing solution for commercial ...

With the help of the BREEAM framework, the project team developed an office building that's not only energy neutral, but energy positive. This is partly due to its efficiency measures; The Edge uses 70% ...

The document summarizes The Edge, a new office building in Amsterdam that sets new standards for sustainability and flexibility.

Thick load-bearing concrete and deeply recessed windows further regulate heat, reducing the need for shades. These features, combined with super-efficient solar panels on the south side, contribute to ...

GSL ENERGY recently supported the deployment of a dual commercial energy storage system in the Netherlands. The project consists of two liquid-cooled C& I energy storage cabinets ...

Energy storage projects in the Netherlands encompass diverse initiatives aimed at enhancing grid stability, integrating renewable resources, and optimizing energy distribution.

This project highlights a 125kW/232kWh commercial battery energy storage system (BESS) deployed by GSL ENERGY at a coworking facility in the Netherlands, enabling continued business growth despite ...
