

What will energy storage be like in 2035?

Energy storage installations globally will keep gaining momentum over the next decade as other markets pick up pace. BloombergNEF expects cumulative energy storage capacity in 2035 to reach 2 terawatts(7.3 terawatt-hours) - eight times the level in 2025. Utility-scale projects continue to dominate applications.

Who are the top rated energy storage companies in the world?

Lithium-ion companies have come out as the top-rated suppliers on a new long-duration energy storage (LDES) leaderboard, while CO2 Battery company Energy Dome is the highest non-lithium company. Power firm RWE is about to start building a 400MW/800MWh BESS project in Germany, among the largest in the country to reach the construction stage.

How big will energy storage be in 2025?

Globally,annual energy storage deployment (excluding pumped hydropower plants) is set to hit another all-time high at 92 gigawatts(247 gigawatt-hours) in 2025 - 23% higher than in 2024. China accounts for over 50% of the annual build in gigawatts, followed by the US at 14%.

Will energy storage capacity reach 2 terawatts in 2035?

BloombergNEF expects cumulative energy storage capacity in 2035 to reach 2 terawatts(7.3 terawatt-hours) - eight times the level in 2025. Utility-scale projects continue to dominate applications. See 2H 2025 Energy Storage Market Outlook for more details.

Chinese energy storage companies are expanding into international markets at an unprecedented pace, from South Africa to Europe and Southeast Asia. With their strong performance ...

HiTHIUM achieves Top 2 global ranking in energy storage and utility-scale BESS shipments, driving long-duration innovation worldwide.

HiTHIUM demonstrated strong performance, ranking Top 2 globally for both global energy storage battery shipments and utility-scale (BESS) battery shipments, further consolidating its leading ...

Global energy storage additions are on track to set another record in 2025 with the two largest markets - China and US - overcoming adverse policy shifts and tariff turmoil. Annual ...

According to InfoLink's global energy storage supply chain database, global energy storage cell shipments reached 612.39 GWh in 2025, representing a 94.59% year-on-year (YoY) ...

Global energy storage shipments jumped 84.7% in the first three quarters of 2025, with Tesla and Chinese manufacturers leading the charge.

InfoLink Consulting has published its 2025 global shipment rankings of energy storage cells, based on its Global Energy Storage Supply Chain Database. It estimates global cell shipments ...

Energy-Storage.news Premium speaks to Daniel Dedrick, US-based BESS developer and operator, GridStor's CTO, about the company's strategies for navigating FEOC and Section 301 tariffs.

According to InfoLink's latest Global Energy Storage Supply Chain Database, global energy storage cell shipments reached 612.39 GWh in full-year 2025, up 94.59% YoY. Full-year shipments ...

Despite the short-term disruptions caused by geopolitical and other factors, InfoLink expects system shipments to exceed 300GWh in 2025, driven by the rigid demand of the global ...
