

No illegal construction of solar power plants

For each state, we created an overview of current and past state law on the placement and regulation of wind and solar power, and a list of counties that currently have blocks.

At least 15% of counties in the U.S. have effectively halted new utility-scale wind, solar, or both, USA TODAY found. These limits come through outright bans, moratoriums, construction ...

President Donald Trump on Wednesday said his administration will not approve solar or wind power projects, even as electricity demand is outpacing the supply in some parts of the U.S.

Explore 10 reasons why industrial-scale solar isn't right for agricultural-rural areas, from storm water concerns, the environmental concerns, soils concerns, loss of historic sites concerns and reduced ...

The extra layer of scrutiny for wind and solar contrasts with actions by the Trump administration to make it easier and cheaper for companies to produce oil, coal, gas and nuclear power.

Paradoxically, the states most likely to do this are some that would greatly benefit from solar power, like Oklahoma, Kansas, and Nebraska. This article will list all the states with the largest ...

Federal agencies have recently issued a barrage of restrictions that could halt construction of solar and wind farms on public and private lands.

As the planet warms and climate disasters grow more costly, the U.S. has set a target to reach 100% clean energy by 2035, a goal that depends on building large-scale solar and wind power.

One farm family hopes to see a solar energy plant built on their land. But in some places, efforts to build utility-scale solar and wind farms are met with fierce opposition.

Local governments across the U.S. are blocking new clean energy plants. See the best locations for wind and solar power, and where it's being stopped.

No illegal construction of solar power plants
