

Outdoor power supply and indoor charging

Can a battery charger be installed outside?

If you install your charger outdoors, you can feel confident it will remain in excellent condition against rain and snow storms. The cord is also waterproof and will create a watertight seal when you connect it to the battery port.

Should you install an EV charger inside or outside?

The main benefit of an EV charger inside is that it will offer protection from the weather, animals, and other people to extend the life of your charger. If you install your charger outdoors, you can feel confident it will remain in excellent condition against rain and snow storms.

Should you have an EV charging station in your home?

If you own an electric vehicle (EV), having an EV charging station in your home is a convenient way to ensure your vehicle is always ready to go. With an EV charging station, you also have the option of installing it inside your garage or outside your home.

Is a Level 2 charger waterproof?

The cord is also waterproof and will create a watertight seal when you connect it to the battery port. One of the most significant benefits of a Level 2 charger is you can install it closer to where you park, so you will not have to worry about running a cord from your garage to your vehicle.
