

What is a Panasonic lithium battery?

A lightweight, high-energy-density battery optimized for stable discharge in high-drain applications such as tactical flashlights and home security systems. Panasonic Lithium is perfect for continuous or intermittent use over long periods in various devices exposed to wide range of temperatures.

Why is Panasonic lithium a good battery?

Our High Energy Formula contributes to Panasonic Lithium's long-lasting endurance in mid and high-drain applications, such as cameras, where the battery's low internal resistance helps to reduce flash-recovery times for rapid burst shooting.

How long can a Panasonic lithium battery last?

Proven battery design, refined materials, special electrolyte solvent, and precise calcination treatment result in a low self-discharge rate during storage. Panasonic Lithium batteries can be safely stored without significant loss of capacity for periods up to 10 years*, with improved resistance to heat and cold compared to other battery types.

How are lithium ion batteries used?

We consider the way they will be used in the final product to ensure customers can utilize our Lithium ion Batteries safely. Lithium ion Batteries offer high energy density, light weight, and a long cycle life, which makes them useful in a wide range of consumer devices, from power equipment and storage batteries to laptop computers.

Lithium ion Batteries offer high energy density, light weight, and a long cycle life, which makes them useful in a wide range of consumer devices, from power equipment and storage ...

Based on Panasonic's unique technology development abilities, production technology, and global supply chain, the company has achieved As utility companies begin the large-scale ...

Panasonic Energy Co., Ltd.'s business scope covers dry batteries supporting convenient, comfortable daily lives, as well as batteries supporting a broad range of social infrastructure and the ...

Panasonic has made significant contributions to energy storage solutions, marked by innovations, partnerships, and advancements in lithium-ion battery technologies.

Panasonic Lithium Cells Panasonic stands as a global leader in advanced lithium-ion (Li-ion) battery technology, renowned for its high-performance, reliable, and safe lithium cells. ...

From the smallest battery pack to the most extensive energy storage system, we can design, develop, produce, distribute, serve, and support solutions that provide superior value to our ...

Panasonic Energy Co., Ltd. Achieving a society in which the pursuit of happiness and a sustainable

environment are harmonized free of conflict, by promoting business areas such as ...

Safely harness pure lithium energy with Panasonic Lithium batteries. A lightweight, high-energy-density battery optimized for stable discharge in high-drain applications such as tactical flashlights and home ...

Panasonic energy storage systems stand out for their advanced lithium-ion technology, high efficiency, and eco-friendly design. They provide reliable, scalable, and long-lasting energy ...

From everyday devices to advanced energy storage solutions, Panasonic delivers reliable power for every need. Choose your product category to discover our comprehensive range of batteries, ...
