

Investment firms PASH Global and ERIH Holdings have formed a joint venture (JV) to develop utility-scale solar and battery storage projects in Paraguay.

Combining high-speed rotational mechanics with smart grid integration, this initiative addresses voltage fluctuations and storage gaps in solar/wind systems. Discover how flywheels outperform traditional ...

The project is mainly invested by State Grid Integrated Energy and CATL, which is the largest single grid-side standalone station-type electrochemical energy storage power station in China so far.

This article explores the city's operational and planned storage facilities, their impact on Paraguay's energy grid, and how companies like EK SOLAR contribute to this green transition.

Building Paraguay's Future Energy Storage Power Station in The new energy storage power station in Porto Cerro represents a strategic shift toward stabilizing the national grid while supporting regional ...

A joint venture (JV) formed by investors PASH Global and ERIH Holdings reportedly plans to develop utility-scale solar power facilities and battery energy storage system projects in ...

100 massive concrete blocks, each weighing as much as 10 adult elephants, dancing to the rhythm of Paraguay's electricity demand. This isn't a sci-fi movie plot - it's the revolutionary Asuncion 100 ...

The new energy storage power station in Porto Cerro represents a strategic shift toward stabilizing the national grid while supporting regional renewable energy integration.

The proposed project will combine wind, solar, battery energy storage and green hydrogen to help local industry decarbonise. It includes an option to expand the connection to 1,200MW. [pdf]

Combining compressed air energy storage (CAES) with solar-thermal reservoirs, this \$120 million project might just redefine urban energy resilience in South America.
