

When electricity demand surges, gravity becomes the generator: stored water cascades downhill through turbines, instantly converting potential energy into electrical power. This mechanical...

It is the largest dam to be built in over 50 years, with the critical objective of addressing water supply security in Metro Manila and the province of Rizal. NIA reported the Upper Wawa ...

Pumped-storage facilities capture this excess renewable energy, storing it as elevated water until needed. The CBK complex exemplifies this capability, housing the Kalayaan I and II ...

The Wawa pumped storage project is recognised as an energy project of national significance. Once completed, it is expected to enhance the stability of the Luzon grid and support ...

The Department of Energy, Prime Infrastructure Capital Inc. and local government units sign a memorandum of agreement (MOA) to form a multipartite monitoring team (MMT) for the 600 ...

Nine major entities -- both local conglomerates and foreign firms -- are vying for control of the country's only operating pumped-storage facility.

Two of Prime Infra's pumped storage projects, planned for development in the Philippines, have received Certificates of Energy Project of National Significance (CEPNS) from the ...

The Wawa Pumped Storage Hydroelectric Power Project in Rizal is designed to deliver 6,000 megawatt-hours (MWh) of daily energy storage with a flexible 600MW charging/discharging ...

As a large-scale pumped-storage facility, Pakil will function as a critical energy reserve, storing power during periods of low demand and supplying it back to the grid during peak hours. This ...

MANILA, Philippines -- The two-gigawatt (GW) pumped storage hydroelectric power projects of tycoon Enrique Razon's Prime Infra were picked as potential winning bidders in the third ...
