

Rent a house with solar panels on the roof to generate electricity

Can renters install solar panels on their own?

In most cases, renters can't install solar panels on their own-- major structural changes like roof installations require landlord approval. However, that doesn't mean you're out of options. In fact, 2025 sees new opportunities opening up for tenants to benefit from solar -- without footing the full bill.

How much does a solar installation cost?

Solar panels are an excellent way to save money on electricity bills and reduce your reliance on your utility. However, a solar installation's price tag of \$15,000 or more can be intimidating. You may have heard of solar leasing as a way to get the benefits of solar panels without the hefty upfront costs.

Should landlords install solar panels?

Landlords who install solar panels may qualify for tax benefits, ECO or SHDF grants, and can boost EPC ratings. That makes properties more attractive to tenants -- and increases long-term value. The Krowd can provide landlords with guidance and access to local installers or funding schemes.

Can you lease solar panels?

Leasing solar panels is like leasing a car: you don't own the solar panels, but you do get to use the solar energy they produce for a fixed monthly payment to the solar company. Solar lease payments are typically designed to be lower than your pre-solar electricity bill, so you'll still see savings every month.

The decision to install solar panels in rental homes extends beyond just utility savings; it encapsulates a holistic approach to sustainable living. One of the paramount benefits is the reduction ...
