

A full-system model of light-heat-electricity energy conversion with supercritical CO₂ flow as the core was built. The 550/200kW supercritical CO₂ turbine generator set was developed. A ...

The total electricity generation from China's first batch of eight solar thermal demonstration plants hit a record high in 2024, marking a 6.71% year-on-year increase.

The Renewable Thermal Collaborative (RTC) is the global coalition for companies, institutions, and governments committed to scaling up renewable heating and cooling at their ...

Authored China's first national standard for solar thermal power generation (2012), promoting industry standardization. As of February 2025, H-index of 51. Holds over 100 authorized ...

China Solar Thermal Alliance (CSTA) is a non-profit organization that supports and promotes the development of the concentrating solar power industry and technologies with the strength of all ...

It is one of the 36 pilot alliances under the Ministry of Science and Technology and one of 26 Class-A alliances (national level). Oriented to technological innovation needs such as solar ...

To gather more research and application achievements related to solar thermal power generation, the conference is now openly soliciting papers from the industry.

Depending on solar concentration modes, commercially applied CSP systems can be classified into four main types, namely, solar tower systems, parabolic trough CSP systems, linear Fresnel CSP ...

As a technology innovation-oriented cooperative organization composed of enterprises, universities, and research institutions, the Solar Thermal Alliance brings together the strengths of its member units ...
