

With decades of experience, Kardex automated storage solutions integrate seamlessly into various temperature-controlled environments, delivering high throughput, minimized floor space, and enhanced product safety.

Self-designed Battery Management System (BMS) protects the cell from extreme temperatures. Modular, sleek design allows neat stacking inside the AZE company solar equipment enclosures. Compatible with most of ...

Discover our range of constant climate cabinets, perfect for cigars, documents, and more. Enjoy reliable temperature and humidity control for long-term storage.

The integrated smart cooling system automatically regulates internal temperature for stable operation. With IP55/IP65 protection, it's ideal for 5G base stations, solar power sites, substations, and outdoor data hubs ...

The equipment has good operability, maintainability, good temperature stability and durability, good safety performance, and does not pollute the environment or harm human health.

With their highly efficient refrigeration system and outstanding thermal insulation, ESPEC's constant climate cabinets are ideal for use in laboratories and research facilities.

This application realizes seamless switching through the detection between commercial power and photovoltaic power supply, when effectively reducing the cultivation cost of green cultivation...

Constant climate chambers are available in different sizes and with different temperature and humidity ranges. Before purchasing, you need to consider in detail the applications for which you need the unit.

Built-in fire, flood, and temperature control with system warnings for safety. Dual fire suppression, ATS/STS ensure seamless power switching. Integrated BMS/PCS/EMS supports diverse ...

The cabinet is designed with a double-layer insulation structure, equipped with an independent internal and external air circulation system, which can provide an ideal operating environment for user equipment that is ...

Built-in fire, flood, and temperature control with system warnings for safety. Dual fire suppression, ATS/STS ensure seamless power switching. Integrated BMS/PCS/EMS supports diverse applications.
