

Palestine is making strides in solar energy with a groundbreaking project. Explore how this initiative transforms the region's energy future!

Renewable energy in Palestine is a small component of the national energy mix, accounting for 1.4% of energy produced in 2012. Palestine has some of the highest rate of solar water heating in the region, and there are a number of solar power projects. A number of issues confront renewable energy development; a lack of national infrastructure and the limited regulatory framework of the Oslo Accords are b...
