

The Minister of Public Works, Samuel Marçal, said that the new photovoltaic solar energy project "will bring significant benefits to Timor-Leste, contribute to sustainable development and environmental protection" and ...

Its equatorial proximity, limited grid coverage, and focus on rural development make East Timor an ideal market for solar energy, particularly for off-grid electrification, rural clinics, and village infrastructure.

East Timor to build its first 72 MW solar plant with 36 MW storage in 2026, reducing diesel reliance and advancing clean, affordable energy access.

The construction of the solar power plant is a key component of East Timor's strategy to diversify its energy sources. The country has been heavily reliant on fossil fuels, but this new initiative will help reduce ...

Manatuto Solar Project: Construction on Timor-Leste's first large-scale 72 MW solar power plant in Manatuto is set to begin in 2026.

Timor-Leste holds a strategic advantage over its neighbours in transitioning to solar rooftops, with potential electricity cost reductions and a recovery period of 2.5 years, lower than regional averages.

KUALA LUMPUR, Oct 17 (Reuters) - East Timor expects the construction of its first large solar power plant to begin in 2026 and become operational months later, the state utility's chair told...

Japan's Itochu Corporation and Electricit  de France (EDF) will jointly develop a 72 MW solar power plant and a 36 MW battery energy storage system in Manatuto. The two companies will supply power ...

East Timor expects the construction of its first large solar power plant to begin in 2026 and become operational months later, the state utility's chair told Reuters, helping it slash expensive diesel imports.

On 24th September 2024, the Government of East Timor, in partnership with the United Nations Development Program (UNDP) and with financial support from the Government of Japan, launched the installation of a ...
