

In this article, we will delve into the circumstances surrounding the shutdown and explore the implications for concentrated solar power (CSP) technology and renewable energy strategies ...

A multibillion-dollar solar plant is set to close down next year because it's supposedly not "serving its purpose", which has left everyone saying the same thing.

In the third quarter of 2025, solar projects representing about 20% of planned capacity reported a delay, a decrease from 25% in the same period in 2024, based on data compiled from ...

Hundreds of new power projects set to be built over the next five years, including utility-sized solar farms and offshore wind farms, were canceled by their developers in 2025 because of the...

Indeed, just six solar projects have been cancelled since 2023, according to data tracked by E2 and the Clean Economy Tracker, compared to six wind projects, 13 storage projects and 16 EV...

For the last decade, drivers on Interstate 15 heading through the Mojave Desert between Los Angeles and Las Vegas have passed by the massive Ivanpah Solar Electric Generating System.

One of the most ambitious solar projects in history is quietly heading for shutdown after just a decade of operation. The Ivanpah Solar Power Facility in California's Mojave Desert was once...

Solar panels, wind turbines and electric vehicles are all becoming more common. So too is the waste when climate technology reaches the end of its life cycle.

Headlines have been circulating major news outlets around the impending closure of the Ivanpah Solar Power Facility, a \$2.2 billion project that began construction in 2010 and has been ...

It summarizes the various solar PV recycling strategies for different types of solar PV panels technologies, and further presents the economic, social, and financial analysis, with ...
