

Is Brazil embracing solar energy?

Brazil isn't just embracing solar energy--it's revolutionizing its potential in the global energy sector. As we count down to the Solar World Congress 2025 in Fortaleza, let's dive into Brazil's solar energy history. Fifteen years ago, no one could have imagined that Brazil would become one of the world's largest powers in photovoltaic solar energy.

Does Brazil have a 'distributed' solar system?

Allied to this, in 2012 the country gave its authorisation for "distributed" generation - the production of energy on a smaller scale, close to the point of consumption. This format now accounts for almost 70% of solar energy in Brazil, and is the main driver of solar's growth in the country.

Are solar power plants a problem in north-eastern Brazil?

Many communities in north-eastern Brazil live close to solar power plants but lack connections to the grid, meaning they cannot access the electricity generated by such facilities (Image: Alan Santos, Palácio do Planalto, CC BY)

Does Brazil have a potential for photovoltaic energy?

During the era of isolated systems, some companies began to recognize Brazil's potential for photovoltaic generation. But it wasn't only the private sector that became interested in this source--the public sector also began seriously considering the possibility of expanding the electricity matrix with photovoltaic solar energy.

Brasília UFV Aurora Local de Equipamentos solar project is an operating solar photovoltaic (PV) farm in Brasília, Distrito Federal, Brazil.

For an investor considering a new solar module factory, Brazil offers a map of immense opportunity. The country boasts high solar irradiation and a growing demand for renewable energy. ...

Arctech, the world's leading tracking, racking, and BIPV solutions provider, announced the new big signing of a collaboration agreement in Brazil namely the 300MW SkyLine project with Alexandria. ...

Abundant clean energy Brazil has abundant and varied natural resources that place it in "a very advantageous position in the energy transition," says Amaro Pereira, an energy planning ...

Arctech Solar, the China-headquartered global solar PV tracker supplier, has formally inaugurated its maiden factory in Brazil with an annual production capacity of 3 GW. This is the ...

(Yicai) Oct. 26 -- Arctech Solar Holding, a Chinese manufacturer of solar panel mounts, is planning to spend as much as CNY430 million (USD58.8 million) building a factory in Brazil to make solar ...

Authors: Dr. Aline Kirsten Vidal de Oliveira, Dr. Marcelo Almeida, Brasília Braga Brazil isn't just embracing solar energy--it's revolutionizing its potential in the global energy sector. As we ...

The new factory in Brazil is an important driver for Arctech's globalisation and is expected to provide customers with reliable tracker systems to jointly build a sustainable future with renewable ...

The new factory in the renewable energy sector reflects Brazil's growing interest in clean energy and Arctech Solar's commitment to contributing significantly to the region's sustainable ...

"Brazil is one of the most important solar markets in the world, and the new installed solar capacity last year demonstrates the country's commitment to renewable energy." A spokesperson for ...
