

The project included the installation of Rooftop Solar PV at Centenary Farmer's Market (CFM) and Ground Mounted Solar Panels at Dechencholing in Thimphu. The first phase of the project completed in May ...

Two pilot projects, each with 180 MW capacity, have already demonstrated solar's potential, particularly during winter when hydropower output drops. A core feature of Bhutan's strategy is linking solar energy to ...

In keeping with the contract, the contractor has successfully installed and commissioned 17.38 MWp of capacity and commenced operations. It is expected to generate approximately 25 million kWh ...

The DSP Solar Initiative (DSP-SI), in its first phase, successfully commissioned a 250 kW rooftop solar power plant at the Centenary Farmers Market on May 29, 2023, and a 500 kW ground-mounted solar ...

The project, located in Wobthang, is set to become the largest ground-mounted solar power station in the country. This initiative is crucial for Bhutan as it aims to lessen its heavy reliance on ...

Sephu Solar Power Plant is an under-construction photovoltaic power station in Bhutan.

The project aims to install 30 MW of solar PV and strengthen the regulatory environment to accelerate Bhutan's renewable energy market, fully realising its solar energy plan of 1000 MW as planned by the government in ...

Electrification of Shangsa Community through Installation of a 30kWp Off-Grid Solar Plant. Lunana Gewog, under Gasa District is one of the remotest places of the country with a total area of 1,716.26 sq.km.

On this journey, together with the story of the Solar Project, we explore the history, significance and stories of the people who live here and what the solar project means to them.

Amidst strong economic growth, especially in infrastructure and manufacturing sectors, a substantial rise in the power demand is expected over the next five to ten years in Bhutan.
