

Renewables developer Ameresco has partnered with EPC contractor Sunel Group to bid on 1.5GWp of solar PV and battery energy storage system (BESS) project contracts across Europe.

Every energy project begins with territory. Land availability, environmental constraints, local acceptance and alignment with existing uses all shape the project from the outset.

This section outlines key EU projects, initiatives, and market trends in energy storage, highlighting efforts to integrate renewables, enhance grid stability, and support the clean energy transition.

Slovenian energy company GEN-I said on Thursday that it has signed a five-year optimisation agreement with Polish renewable energy projects developer R.Power Renewables for a ...

Nuveen, formerly Glennmont Partners, is a London-headquartered investor active in clean energy and battery energy storage systems internationally. It commissioned a 30MW BESS in ...

The goal is to list all planned and operational energy storage projects in Europe by location and technology. The dashboard can be filtered by country, project status and technology.

This year has been particularly active: 25 of these projects have seen developments in 2025, representing 1,335.62 MW moving forward with favourable environmental impact statements or ...

Algeria, Austria, Germany, Italy, and Tunisia have signed a declaration to develop the Southern Hydrogen Corridor, a 3,500 km to 4,000 km project to transport hydrogen from North Africa to Europe

Whether it's grid-side storage in Germany, capacity market projects in the UK, or solar-plus-storage systems under construction in Southern Europe, the demand for battery container ...

ENGIE has officially completed both phases of its 200 MW battery energy storage system (BESS) at Vilvoorde, Belgium. The 800 MWh installation, composed of 320 lithium-ion battery ...
