

The spiral steel pile foundation, also known as a steel ground anchor, is an increasingly widely used foundation form for photovoltaic brackets. It consists of hot-dip galvanized steel pipe ...

The common forms of photovoltaic support foundations include concrete independent foundations, concrete strip foundations, concrete cast-in-place piles, prestressed high-strength concrete (PHC ...

The invention belongs to photovoltaic module technical field, particularly a kind of photovoltaic bracket spiral ground pile and manufacturing process thereof.

The photovoltaic spiral pile is made of high-strength materials, has excellent corrosion resistance and structural strength, and can maintain long-term stability under harsh climatic conditions.

Galvanized Outdoor Steel Fence Post Spike Pointed Pole Anchor Ground Screw Post spikes are metal brackets that set into the fence post or concrete footing to ensure the constructions firmly fixed in the ...

This page contains information, parameters and features of spiral pile system (photovoltaic bracket) products. Welcome to visit and consult

Photovoltaic spiral ground piles are steel (or composite) piles with spiral blades. They are installed underground through a rotary press-fit method, eliminating the need for excavation and maintenance.

Spiral Ground Pile Photovoltaic Support Solar Cell Hot-DIP Galvanized Ground Screw

The utility model belongs to the technical field of the photovoltaic support, concretely relates to spiral ground stake photovoltaic support.

The spiral steel pile foundation, also known as the steel anchor, is an increasingly widely used form of photovoltaic support foundation. It uses hot-dip galvanized steel pipe piles with spiral ...
