

The technology group W& #228;rtsil& #228; will supply a 7.8-megawatt (MW) / 7.8-megawatt hour (MWh) energy storage system to a leading gold mining company to help achieve its climate targets and ...

Objective: Guide the sustainable development of the power sector and ensure a reliable supply of electricity over a 20-year long-term strategic view, with a 5-year action plan

Paramaribo's storage roadmap reads like a tech wishlist: liquid air storage trials by 2026, hydrogen hybrid systems by 2028, and - wait for it - kinetic storage using modified river turbines.

"We remain on track with our energy storage growth targets, with plans to bring online two additional assets in 2023 and make further progress towards achieving between 500 to 530MW and over ...

Suriname's Expansion Plan ensures a reliable and sustainable electricity sector for 2025-2029, with a 20-year strategic outlook to 2044 with a 5-year action plan

The government's recent National Energy Transition Plan 2024 aims to flip this script through battery energy storage systems (BESS), but how exactly will this tropical nation overcome its energy storage ...

As Suriname anticipates off-shore oil production in 2028, careful policy planning and equitable infrastructure will be essential. Revenues must be strategically reinvested into renewable ...

As Paramaribo marches toward its 2030 renewable energy targets, one thing's clear: energy storage system equipment isn't just supporting the grid - it's rewriting Suriname's energy playbook.

A large-scale battery storage facility providing ancillary services to the grid has gone into commercial operation at the site of a hydroelectric power plant in the Philippines. ...

Have you ever wondered how a small South American nation like Suriname could become a renewable energy leader? Well, the \$120 million Paramaribo Battery Energy Storage System (BESS) project ...
