

# Technical standards for emergency energy storage boxes

While NFPA 855 is a standard and not a code, its provisions are enforced by NFPA 1, Fire Code, in which Chapter 52 outlines requirements, along with references to specific sections in NFPA 855.

The focus of the following overview is on how the standard applies to electrochemical (battery) energy storage systems in Chapter 9 and specifically on lithium-ion (Li-ion) batteries.

The CPUC modified General Order 167, which currently provides a method to implement and enforce maintenance and operation standards for electric generating facilities, in order to add ...

The clean energy industry, represented by the American Clean Power Association (ACP), encourages state and local jurisdictions to incorporate or adopt National Fire Protection Association (NFPA) 855, ...

The Draft of the new PAS 63100 standard for protection against fire of battery energy storage systems for use in dwellings is now available for public comment on BSI's Standards a?]

This webpage includes information from first responder and industry guidance as well as background information on battery energy storage systems (challenges & fires), BESS installation ...

Until existing model codes and standards are updated or new ones developed and then adopted, one seeking to deploy energy storage technologies or needing to verify an installation's safety may be ...

NFPA is keeping pace with the surge in energy storage and solar technology by undertaking initiatives including training, standards development, and research so that various stakeholders can safely ...

The 2026 edition of NFPA 855 updates safety and installation requirements for stationary energy storage systems (ESS), with a strong focus on lithium-ion battery systems under Chapter 9.

Section 1207 - Electrical Energy Storage Systems (ESS) Continued language alignment with NFPA 855 - Scope section of 1207 reads, "Material based on NFPA 855 2023 Ed."
