

Three modes of photovoltaic panel leasing

Are solar panels a lease or a PPA?

Maintenance: If you choose a solar lease or PPA, the leasing company owns the solar panel system and typically offers a service program to cover any maintenance issues that arise during the lease term. On the other hand, if you take out a solar loan to purchase your system, you'll be responsible for its maintenance.

Should you lease solar panels?

Leased solar panels come with the main benefit of any home solar panels: reduced energy cost. Because you don't own the panels on your roof, you aren't responsible for the solar panel maintenance. The company that owns them is. They'll also be responsible for removing them at the end of the solar lease.

How does a solar panel lease work?

Companies calculate this rate based on the estimated annual production of your solar panel system and include this rate in your contract. Your lease will also have a fixed term length, typically 20 to 25 years.

What is a solar lease?

Much like a car lease, a solar lease is an arrangement for you to have access to solar electricity without actually owning a solar system. In a solar lease, a company will install a solar system on your home and then charge you a monthly rate that replaces your utility electricity bill.
