

We're seeking views on policy proposals to support the deployment of domestic non-pipeline transport (NPT) projects.

These projects include a variety of storage methods such as Li-Ion batteries, flow batteries and pumped hydro storage, which releases water stored at height to turn turbines, creating...

On 10 October 2024 the UK Government gave the green light to a cap and floor scheme to help bring long duration energy storage (LDES) projects to market. LDES projects include pumped storage ...

Carbon capture, usage, and storage (CCUS) will be essential to meeting the UK's 2050 net zero target, playing a vital role in growing the economy, supporting the low-carbon economic...

Carbon capture, usage and storage (CCUS) will be essential to meeting the UK's 2050 net zero target, playing a vital role in levelling up the economy, supporting the low-carbon economic...

Ofgem, the UK's energy markets regulator, has deemed Highview Power's proposed 3.2-GWh liquid air energy storage facilities at Hunterston and Killingholme eligible under its cap-and-floor...

The UK energy regulator, Ofgem, has advanced 77 Long Duration Energy Storage (LDES) projects into the next phase of its "cap and floor" revenue support scheme.

To meet the UK's net zero target, key technologies that reduce greenhouse gas emissions must be commercialised, scaled and deployed across the country.

The UK has the potential to be one of the greatest CO2 storage bases in Europe, with billions of tonnes worth of storage-opening up economic growth and exciting global investment...

In this blog, we'll explore the top 7 battery energy storage system projects in the UK for 2025. We'll look at each project's capacity, project cost, current status, and how it supports the broader shift to clean ...
