

Unauthorized installation of solar grid-connected inverters

U.S. energy officials have launched an investigation after discovering unauthorized communication equipment embedded within Chinese-manufactured solar power inverters connected to critical ...

This investigative article exposes the discovery of undocumented communication devices hidden in Chinese-made solar inverters, creating unprecedented vulnerabilities in global power grids.

U.S. officials have discovered undisclosed communication devices on Chinese-made power inverters that were being used on solar panels, Reuters reported today based on anonymous ...

U.S. energy officials have launched an investigation after discovering unauthorized communication equipment embedded within Chinese-manufactured solar power inverters connected ...

Reuters was unable to determine how many solar power inverters and batteries they have looked at. The rogue components provide additional, undocumented communication channels ...

Power inverters, produced primarily in China, are used around the world to connect solar panels and wind turbines to the power grid. They are also found in batteries, heat pumps and electric ...

Experts uncover rogue devices in Chinese-made inverters and batteries, prompting U.S. and EU nations to review renewable tech security.

As grid-tied inverters become increasingly integrated into the Internet of Things (IoT), cybersecurity becomes a paramount concern. The new regulations address these concerns by ...

U.S. experts have allegedly found rogue communication devices, including cellular radios, in Chinese-made solar inverters and batteries over the past nine months.

Unauthorized installation of solar grid-connected inverters
