

What does it mean that BCM has lost communication with the base station

What is an example of a Body Control Module (BCM)?

An example of a Body Control Module (BCM): The code may be detected when the ECM has not received an emission-related CAN signal from the BCM for at least two seconds. Note: This DTC is basically identical to U0141, U0142, U0143, U0144, and U0145.

What does a bad BCM code mean?

The code, depending on the year, make and model of the vehicle, may mean that the BCM is bad, that the BCM is not receiving or sending a signal, the BCM harness has an open or short, or that the BCM is not communicating with the ECM via the controller area network - the CAN communication line.

What is ECM communication loss?

ECM communication loss means that the ECM is unable to send or receive data from other vehicle components. Modern vehicles and machines use a Controller Area Network (CAN bus) system to facilitate communication between different modules.

What does u0140 mean on a PCM?

This exchange of information is monitored continually, and should the PCM detect a break in communication between itself and any part of the system that is controlled by the body control module, it will set code U0140, and depending on the application and the nature of the failure, may also illuminate a warning light.

We recommend Torque Pro Table of Contents What Does Code U0140 Mean? Where is the U0140 sensor located? What are the common causes of code U0140? Get Help with U0140 ...

Repair Information for U0140 code. Learn what Lost Communication with Body Control Module means, location and how to repair.

So, let's dive a little deeper. What Does Code U0140 Mean? U0140 is a generic diagnostic trouble code (DTC) that stands for "Lost Communication With Body Control Module." This code generally means ...

The U0140 trouble code technically means "Lost Communication With Body Control Module (BCM)". Here's exactly what you need to do to fix it.

What Does The U0140 Code Mean? The body control module (BCM) is an electronic module that is part of the vehicle's entire electrical system and it controls functions including but not ...

This is one of the most frequent OBD2 trouble codes. Read the full article below to know what it means, how to fix it, and what other codes may show related to it. Definition U0140 is an OBD ...

U0140 indicates "Lost communication with the Body Control Module (BCM)." This error points to a

What does it mean that BCM has lost communication with the base station

communication issue between the Body Control Module (BCM) and other modules within the vehicle.

U0100 - Lost Communication with ECM/PCM U0140 - Lost Communication with Body Control Module (BCM) U0073 - Control Module Communication Bus "A" Off What Does "Lost Communication with ...

Lost Communication With Body Control Module What does that mean? This is a generic powertrain code, which means it covers all makes/models, 1996-newer, including but not limited to Ford, ...

U0140 - Lost Communication With Body Control Module means the vehicle's control units--typically the PCM, ABS module, TCM, or instrument cluster--can no longer communicate with ...
