The transformer is incorporated into 10kV power grid with low loss, low noise, anti pollution and strong short-circuit resistance. It is widely used in distributed photovoltaic power plants and other fields.

This project is directly integrated into the public grid through photovoltaic power generation and connected to the high-voltage power transmission system to supply long-distance loads.

Jian Zhengwei Technology Co Ltd (Jian Zhengwei Technology) develops, produces, distributes and generates electricity from thermal combustion engines, hydro, wind, and solar photovoltaic energy.

Sichuan Zhengwei Power Technology Co., Ltd. was founded in January 2009, headquartered in Chengdu, Sichuan Province, with a registered capital of 10 million yuan.

We are exploring the development of alternative - energy - related products, such as hybrid power generation systems that combine diesel engines with renewable energy sources like solar or wind.

Sichuan Zhengwei Power Technology Co., Ltd. was founded in March 2020. The company is headquartered in Chengdu, Sichuan Province, with a registered capital of 10 million yuan.

Understand the full story: Dive deep into the Ji~an Zhengwei Solar PV Park report and gain access to vital information such as plant name, technology, capacity, status, plant proponents, ...
